KVDA

Who we are:

Kenya Voluntary Development Association (KVDA) is an indigenous and membership organization which is non-political, non-sectarian and non-profit started in May 1962 as a work camp Organization. In 1969 the organization widened its scope and diversified its operations in the entire development spectrum with the international voluntary service exchange as the core-competence of the Association.

What we do:

Our strategic objectives:

- Communities are aware of development issues, mobilized resources and taken responsibility of their own development.
- Young people have access to experiential education by offering voluntary service

Our programs:

- Work camps
- Medium and Long-term Voluntary Service Projects
- Language i.e. Kiswahili and English training
- Performing arts
- Educational tours
- Enterprise development
- Exchange programs
- Capacity building and empowerment for self help groups
- Awareness creation on thematic issues i.e. HIV/AIDS, Malaria, Tuberculosis, Civic education, Girl child education, Gender, Peace building and conflict transformation, Protection of world heritage sites, Environmental conservation est.

Pamoja International Voluntary Services

Who we are:

Pamoja international voluntary services (P.I.V.S) is a non-profit, without any political or religious affiliation a registered non governmental organization, based in Nairobi Kenya. Our objective is to organize International work camp and, medium term volunteer program, where both local and international volunteers offer their services for free, in collaboration with community groups or institutions in need of voluntary labour or service to empower community self-help initiatives.

What we do:

Organized together with Mwakiki community since 2009. This is a community based organization where members and the community in general work together to build or construct social amenities or facilities.

The community is planning to construct water tanks, as this area is a semi arid region and also they also going to construct a gabion, sometimes when there is too much rain the water washes away plants and a lot of water get lost. To avoid soil erosion they will be building gabions. Need volunteers to achieve the project goal.
