

Who we are:

Young Researches of Serbia (YRS) is a non-profit, non-political NGO officially established in 1976 as a network of organizations, societies, clubs and sections with research programmes, gathered around the coordinative office on the national level in Belgrade. Through its history the number of members changed, but there were over 50 different organizations taking part. In the 90's YRS leaves the organizational form of vertical relationships following the current direction of civil sector development. Today YRS represents the organization on the national level and it unites three thematically different but interconnected sectors – Youth Sector, Voluntary Service of Serbia and Environmental Protection and Conservation Sector. Young Researches of Serbia involves mostly young people aged 15-30, including the ones with physical or intellectual disabilities, or difficult social backgrounds.

What we do:

Driven by science and education, our mission is to contribute:

- to environmental protection and nature conservation,
- to development of voluntarism and its values,
- to scientific creativity and active participation of the youth

Our main aims are environmental protection, environmental education, youth exchange and work with young people, as well as the promotion of sustainable development, scientific creativity and voluntarism.

We have organized hundreds of research projects and educative programmes for young people in various areas of natural and social sciences.
