To work together and develop our raising awareness skills and tools in order to sensitize to active citizenship AND increase the number of participants involved in our projects..

Each year, we find a significant number of youngsters (individually or in groups) interested to get more information regarding citizenship involvement and volunteering. Through this seminar, we would like to share, enhance and diversify our methods and awareness tools, for different target groups and in different contexts (festival, classes, fairs, ...), to promote the values and objectives of active citizenship activities, in particular workcamps and other international volunteering projects.

Our contact making seminar must gather organisations interested in exchanging experiences and know-how's about awareness tools. It should enhance our collaboration and partnerships on these projects, by creating a common frame for qualitative animations/awareness sessions, as well as a toolkit of animations used by the different partners attending the CMS
